23rd October 2012

AUSTRALIAN STOCK EXCHANGE LIMITED

Electronic Lodgement

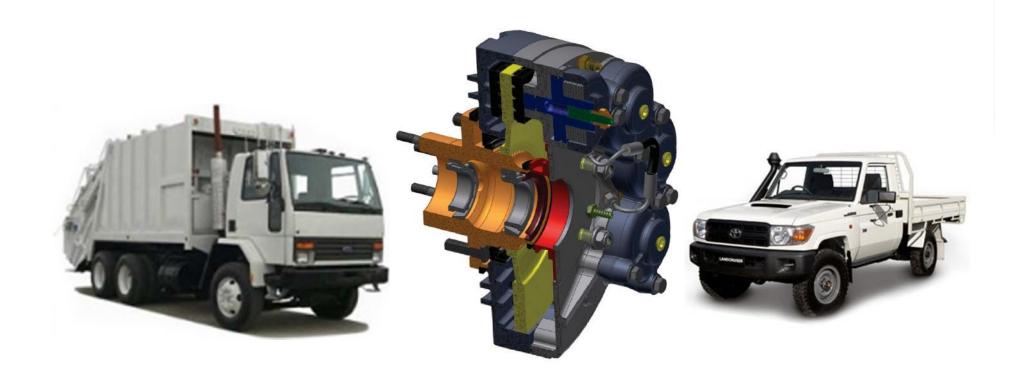

AMENDED CEO & CFO PRESENTATION TO BE DELIVERED AT THE 2012 AGM

Appended are amended copies of the CEO's and CFO's presentations to be delivered to Shareholders at the Company's 2012 Annual General Meeting to be held at 10.00am today.

Yours faithfully

1

Clare Madelin Company Secretary

Advanced Braking Technology Limited

Annual General Meeting Presentation 23rd October 2012

Agenda

- 1. Chairman's Address
- 2. Formal Business
- 3. CEO's Report
- 4. CFO's Report
- 5. Questions and Answers

Chairman's Address

Mr David Humann Chairman

Advanced Braking Technology

Formal Business

Advanced Braking Technology

Accounts and Reports – receive and consider the financial report and the reports of the Directors and of the Auditor for the financial year ended 30 June 2012

PROXIES RECEIVED

	Resolution	For	Discretionary	Abstain	Against	Total
1	Adoption of Remuneration Report	189,430,928	97,543,161	180,534,387	107,318,522	574,826,998
2	Re-election of Mr David Humann	362,496,990	105,355,311	0	106,974,697	574,826,998
3	Ratification of Prior Issue of Ordinary Shares	468,985,862	105,355,311	205,260	280,565	574,826,998

POLL (if required)

Mr Ken Johnsen Chief Executive Officer

Advanced Braking Technology

FY2012 Operational Highlights

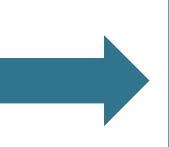

Key milestones delivered in 2012

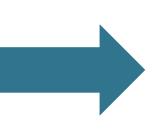

Mining

- Expand SIBS II features to all mining products
- Expand product range
- Explore cost saving enhancements
- Expand service agent network
- ✓ Grow export sales

Garbage Truck Brake

- Prepare for garbage truck launch
 Garbage Truck Brake
- Achieve production 'sign off' for Garbage Truck Brake

Mining

Transition to the improved SIBS® II version of the light commercial vehicle brake across various Landcruiser models Development of SIBS® II variant for Toyota Hilux and other similar sized vehicles Preparations for ANCAP 5 vehicles underway Modular EMMA hydraulic unit developed Service agent network doubled (3 to 6 agents) 11% growth in export sales

Garbage Truck Brake

Extensive in-field and bench testing validates key features ahead of production decision

Development of ABS (anti-skid) version of the SIBS[®] Garbage Truck Brake

Confirmation of environmental benefits - significant reductions in dust particle and noise pollution

Formal approval for production go-ahead given by Board in July 2012

Company Overview

- ABT is a developer, manufacturer and worldwide distributor of its award-winning, patented Sealed Integrated Braking System (SIBS[®])
- SIBS[®] is a fail-safe, enclosed "wet" braking system for off-road and on-road applications
- SIBS[®] technology is extensively proven and has been established in the mining industry over many years
- ABT is now using its SIBS[®] technology to target full scale commercial roll out of its garbage truck brake product in CY2013

ABT is a Listed Company on the ASX

Share Price	\$0.019
Shares on Issue	1.1 billion
Market Cap	\$21 million
52 Week High	0.026
52 Week Low	0.013

Vision and Strategy

Vision:

To be the industry leader in developing, manufacturing and distributing safe and efficient braking technology across multiple applications and sectors

Strategy:

- > **Pursue robust growth** through:
 - Leveraging **strong mining market** positioning to provide funding for product and sector expansion
 - Commercial roll-out of Garbage Truck Brake in Australia and other countries

 North America and Europe
 - Entry into other sectors using "frequently stopping trucks"
 - Expand export sales into new markets
 - Invest in research and development focusing on upgrading and expanding product range to increase market share and expand into new industries

Investment Proposition

- > Unique, proven and patent protected technology
- Global market potential across multiple applications and sectors
- > Significant competitive advantages over alternative products
- Compelling customer offering "triple bottom line" benefits
- Robust commercial model with attractive margins and high scalability
- Strong Board and management with extensive technical and commercial expertise
- > Significant valuation upside potential

Our Technology

Sealed Integrated Braking System (SIBS[®])

- > Fully enclosed, single rotor, high speed wet brake
- > Incorporates fail-safe features
- > Designed for retro-fit or factory fit
- > Comprehensively patented Australian invention
- > Virtually wear and maintenance-free (unlike conventional drum and disc brakes)
- > Manufactured in Thailand, through wholly-owned subsidiary

Comprehensive Patent Protection

- > 61 international patents or patent applications
- > Average patent life of 12 years
- > New patents being lodged as developments continues
- > Trademark protection on various trademarks including "SIBS" and "ABT"

How Our Technology Works?

- Wet brake technology enables a cooler operating temperature, essential to longer lasting and safer braking systems
- System encloses key components the single rotor, brake callipers and brake pads – within a casing containing the SIBS® cooling fluid
- Cooling fluid is specifically formulated oil which controls the operating temperature of the system

Blue Chip Customers

Global Market Potential

"Breaking into a Mainstream Market by leveraging off the mine tough heritage"

Prime Target Market – Waste Sector

Multiple customer "calls to action":

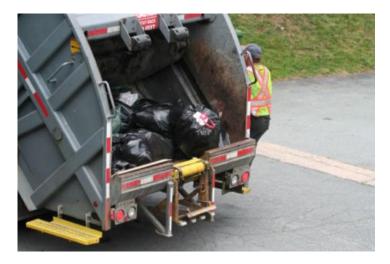

- Brakes are the second biggest expenditure after fuel for garbage truck fleet operators
- > Public desire for noise reduction
- > Global drive to reduce pollution

Australian market:

- > Dynamic, recession-proof industry
- > Annual growth rate of 5.4% (ABS, 2011)

Global growth potential:

- > Next targets:
 - Expanding into North America and Europe
 - Highest waste generating markets in the world (per capita)

Garbage Truck Brake

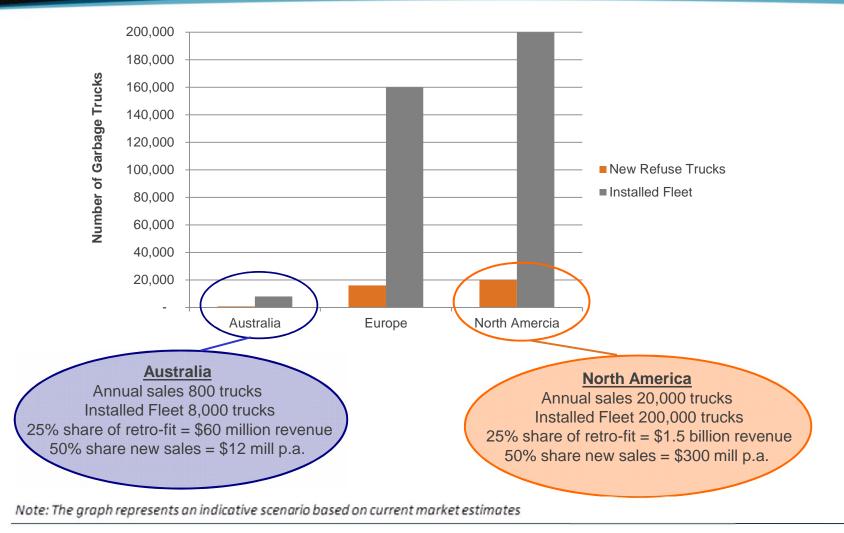

- > Multi year development program now complete
- **Commercial roll out** set for CY2013
- > Technical risk is very low:
 - ABT has significant experience and expertise with the associated technology
 - Long history of successful application
 - Extensive and successful testing process
- > Targeted customers expressing significant demand interest

> Launch Strategy:

- Initial Sales into Australian retro-fit market low barriers to entry
- Retro-fit facilitates rapid take up
- Australian OE (new truck sales) will follow
- Export markets (retro-fit and OE) will follow after Australian launch

Garbage Truck Revenue Potential

Advanced Braking Technology

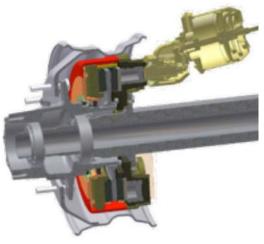

Compelling Customer Offering

"Triple bottom line" benefits

- > Financial Savings:
 - Dramatically reduces frequency of brake overhauls from more than twice a year, to once every two years or longer
 - Reduces annual operating costs by up to \$15,000 per truck
 - Customer payback on initial investment < 2 years
 - Tyre wear 30% less
- > Superior Operating Performance:
 - Brakes are virtually wear and maintenance-free, unlike conventional drum and disc brakes
- > Safety and Environmental Benefits:
 - Total elimination of brake noise and dust emissions
 - Provides consistent safer braking at all times
 - Avoids need for regular checking and adjustment

Customer's Endorsement

"While the prime advantages are the significantly lower brake wear and improved safety, the testing has highlighted a number of other benefits with the new SIBS system, notably more control and confidence in the braking system.

"There's also the added bonus of no brake squeak, which is always a welcome relief for both drivers and residents "

The trial has been so successful, the City is investigating the possibility of extending the use of the SIBS across other vehicles in the City fleet.

"After six months of the trial, the brake pads show very low rates of wear, which should result in greatly reduced brake service cown time and costs for the vehicles," Mayor Zannino said.

"The results indicated only minimal wear whereas a standard truck would be close to or past its wear limit at this point.

"This ndicates brake service intervals well beyond the two year in:erval the City is targeting.

"Along with fuel costs, the brake system is the major operating cost for the waste management vehicles so this type of technology is important to the City to help it minimise the overall operating costs of its fleet."

ENDS

The City of Swan is evaluating 2 trucks fitted with SIBS

Its Mayor Mr Charlie Zannino stated in a press release last week:

Extract -

The trial has been so successful, the City is investigating the possibility of extending the use of the SIBS across other vehicles in the City fleet.

After six months of the trial, the brake pads show very low rates of wear, which should result in greatly reduced brake service down time and costs for the vehicles.

The results indicated only minimal wear whereas a standard truck would be close to or past its wear limit at this point."

mining industry.

Competitive Advantages

- > Significant product development investment time and capital
- > Comprehensively patented technology for 10 years
- > No existing competition
- > Braking technology extensively proven in commercial application
- ABT known as a reliable supplier in mining sector that provides quality, timely and reliable support
- Brakes designed to be retro-fitted, significantly increasing the immediate potential market
- Compelling proposition for Original Equipment take-up
- > Seamless compatibility with modern anti-skid systems (ABS)

Garbage Truck Brake Roll - Out

					12/13				\rightarrow	\leftarrow			13/14			\rightarrow
	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sept	Oct	Nov	Dec	
Frozen Design																
First 10 sets under construction																
First Truck Built																
Subsequent/Sales Truck Builds																
Monitoring of First Sales in the Field	l															
Engangement with Waste Industry																
Ramp up to Full Scale Production																

Further Applications

- Penetration into the garbage truck market provides an entry point into other "frequently stopping vehicles"
- > **Buses** similar drivetrain to waste vehicles and can be easily adapted
- > Logging and similar heavy haulage trucks with high brake demands
- Military vehicles used in harsh conditions and need low thermal signature

Buses

Established Presence in Mining Sector

Australia:

- Growing market share currently 25%
- > Product improvement driving growth
- > SIBS[®] technology now standard in many vehicles, across many mining sites
 - > Olympic Dam, Xstrata Zinc George Fisher, BHP Nickel West
- > SIBS[®] II currently ABT's standard product offering for Landcruisers in Australia
- > Developed SIBS® II for Toyota Hilux and expanding to other similar vehicles
- > Compatible with ANCAP 5 safety rated vehicles

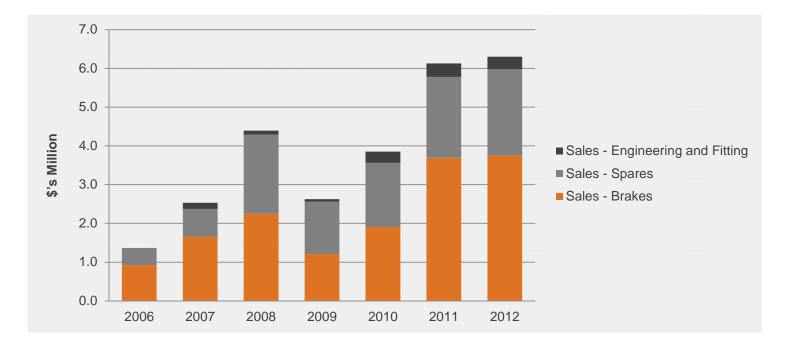

Export:

- > Representing 25% of total sales (average over last 3 years)
- > Strong foothold in South Africa and Canada
- > Expansion into new markets (e.g. USA, Central/West Africa, South America)

Significant Growth in Mining Sales

- > Proven success in the mining industry
- > \$1.33 million profit contribution in FY12
- > Over 400% growth in brake sales over the past 6 years

Mining – Growth Drivers/Opportunities

Growth set to continue

- > Ongoing industrialisation of emerging economies led by China and India
- > Strong growth in new mine development
- > Expansion into surface mines with safety and productivity focus

Increased Focus on Safety Regulations

- WHS Act (Jan 12') and pending MHS Act (Jan 13') greater focus on responsibility of mine holders/operators to ensure worker safety
- "Uncontrolled vehicle movements" are a major problem for mine operators results in fatalities and injuries on site
- SIBS[®] brakes significantly improve safety for mine operators with a three-in-one service, park and fail-safe emergency brake

Growing Emphasis on Productivity

- Sector productivity has declined 50 per cent since 2001 (PWC Report 2012) many companies have renewed focus on improving mine productivity
- SIBS[®] brakes increase productivity by reducing brake overhaul and therefore vehicle downtime on site

Robust Commercial Model

Attractive business:

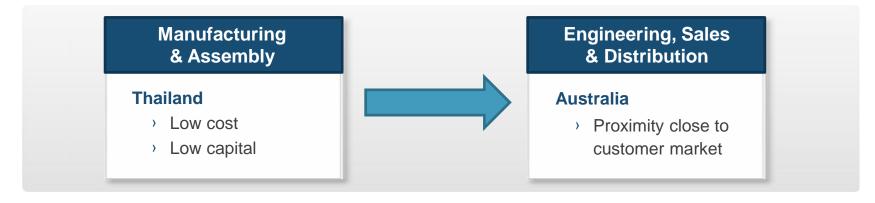

- > High margins similar to mining products
- > Highly scalable cost base with efficient fulfilment model

Business model supports high long term Rol:

- > Benefits of offshore outsourced manufacturing
- > Low cost fulfilment model
- > Low capital intensity

Advanced Braking Technology Lt

Current Outlook and Priorities

- Main focus for FY13 is the commercial roll out of the Garbage Truck Brake
 - All indicators suggest that there will be a strong demand
 - A progressive and controlled launch is planned
- Mining sales will continue to play an important role in the Company's future, however external factors in mining make precise forecasts difficult
- These external factors are resulting softer sales at this point in time.
- Garbage Truck Brake sales are expected to provide a more reliable and consistent sales pattern
- Export sales in mining will continue to grow through expansion into other countries, such as USA, Central/West Africa, South America

CFO Report

Chief Financial Officer Clare Madelin

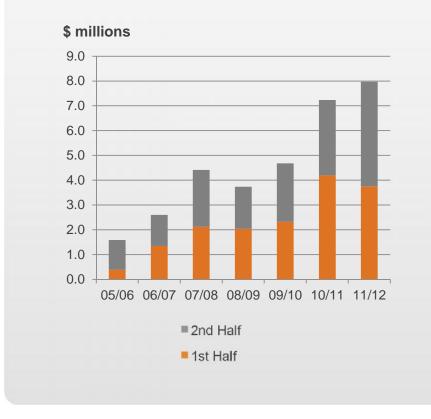

Advanced Braking Technology

FY2012 Financial Highlights

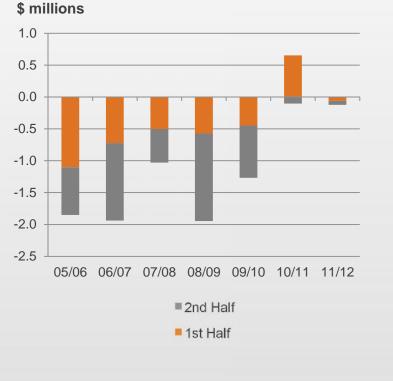

- Total **revenue +10%** to \$8 million
- Mining sales generated \$1.33 million profit with sales up by 3% to \$6.3 million (sales for first three quarters up by 17%)
- **Export sales** +11%, represents c22% of total sales
- Overall net loss of \$123k is attributed to the substantial investment in upgraded products
- Successful **\$2.1 million capital raising** in April 2012
- **Commercialisation Australia grant** of \$761,000 in support of the Garbage Truck Brake development
- **R&D Tax Incentive** of \$786,000
